## Daubert Cromwell to Show Corrosion Inhibitor (VCI) Packaging for Metals at Pack Expo

ALSIP, IL – Corrosion preventive packaging for metalworking industries will be exhibited by manufacturer Daubert Cromwell during Pack Expo, Nov. 6-9, 2016, in Chicago.

Packaging design experts will be at Booth E-7835 to provide technical assistance and demonstrate how its VCI films, bags, papers, liquids and anti-rust devices protect metals in all stages, from production to export. They will demonstrate industrial uses for the full range of Daubert Cromwell products, including popular rust remover Evapo-Rust soak solution.

Daubert Cromwell, a global manufacturer based in Illinois, markets and sells its VCI packaging materials to most of the major names in industries where corrosion protection is essential – automotive, heavy equipment manufacturing, fabricated metal parts, electronics, military, aviation and aerospace. Experienced personnel from the company’s management, sales, service and technical departments will be on hand to share their knowledge of corrosion inhibitor requirements in all these markets, globally.

In addition,

- Visitors can pick up a free poster, “VCI Packaging Guidelines,” to hang in industrial plants where metal parts are handled, wrapped and prepared for shipment.
- The Daubert Cromwell booth will be a destination in "The Amazing Packaging Race," where teams of students from 10 universities perform tasks for points in a timed race around the McCormick Place the exhibit halls. The race takes place on Nov. 9.

For information or a free poster before the show, call 800-535-3535 or send a request to [info@daubercromwell.com](mailto:info@daubercromwell.com).
