Daubert Cromwell Speaker to Address Copper/Cobre 2013 on Corrosion Prevention

October, 2013 -- Scott P. Kotvis, Daubert Cromwell Director Global Business Development, will be a guest speaker at the 8th International Copper/Cobre Conference in Santiago, Chile in December. His topic will be “VCI (Volatile Corrosion Inhibitor) Treated Packaging for Protecting Copper From Corrosion During Storage and Transport.”

Kotvis is among a select collection of professionals, researchers, academics and executives whose work was accepted by the Chilean Institute of Mining Engineers as a significant contribution to technological solutions for problems in the mining industry. His technical paper reflects his extensive experience designing corrosion inhibitor packaging solutions, developed during 15 years with VCI industry leader Daubert Cromwell. Kotvis is an internationally recognized speaker who has held numerous sales management positions since joining the company in 1999.

The prestigious Copper/Cobre Conference is held every three years to discuss topics about the world economy, mineral processing, extractive mining, environmental and social issues affecting the scope of research and innovation on alternative uses and applications of copper. It is the key event for presenting major developments, projects, technology advances and best practices related to mineral processing, copper metallurgy and similar activities specific to mining audiences.
